CHAMELEON 300

series DJ by FLASH

Moving heads SPOT

Chameleon 300 is a modern spot lighting fixture that combines advanced technology with high performance. Its two-phase high-speed Pan/Tilt system ensures exceptionally quiet operation (31–39 dB in low mode), making it ideal for noise-sensitive environments. The fixture features a 140 mm optical lens that produces a powerful, uniform beam with a zoom range from 5° to 45° and less than 10% brightness difference between the center and edges. Color wheels with 6 colors, CTO, and white, along with a versatile gobo set (5 static, 7 rotating, and a water effect), allow for dynamic and creative lighting effects.
